Master Joiner and Kitchen Design Business

Just listed - a well established kitchen and bathroom joinery business with high turnover and profitability by industry standards.

Over 12 years of operation with consistent year on year performance and largely buffered from the impact of Covid-19 due to the high demand for services and products.

The business is well managed, operating out of new modern premises comprising a showroom, offices and joinery workshop. Established systems and a qualified team of designers and joiners in place. Integrated design through manufacturing systems provide for a seamless job flow. Equipment includes a modern CNC and laser airtech machine.

This highly profitable business generates an annual turnover in excess of \$3m with a EBPITD of over \$800k per annum. Forward quoted and accepted jobs are expected to result in revenue exceeding \$3.5m for FY2024.
