DIGITAL SUPPLY CHAIN INVESTMENT

This established IT technology business is poised for great things using proprietary, internationally certified data exchange technology to implement e-commerce solutions by bespoke integrations or turnkey portals.

Opportunities for growth are limitless both within NZ and internationally for an experienced investor or acquirer with the vision to pick the market and with the resources to capitalize on the opportunity. Current clients are predominately NZ blue chip and public sector with inroads into a number of verticals e.g. health.

Health responses over the last year or so are driving more and more businesses towards contactless, e-commerce solutions and essential service digital and supply chain businesses are in high demand.

The shareholders are flexible on how a deal might be structured hence no price quoted at this stage.

What is not flexible is the proven track record of the investor company in successful commercialization and exit.
