High Quality Bulk Manuka Honey Production Business

This business, situated in the Far North District, has a prosperous track record in producing high-quality manuka honey (ranging from UMF10+ to UMF25+).

Its offerings include a fully functioning manuka production business with approximately 1,400 active hives, with room to grow. On average, they produce 20,000kg of superior manuka honey per year, and in good years, they can produce up to 50,000kg.

The business comes with purpose-built, fully contained buildings (including land & buildings), staff accommodation, and ample space to expand hive numbers and nucs.

Moreover, the business has secure hive locations with written land agreements, which includes wintering sites. It has a reliable team of competent beekeeping staff who are well-versed in apiary practices and production techniques and would like to continue working with the new owner. The business also has appropriate and purpose-built plant and equipment, and the vendors are willing to provide their knowledge and assistance for up to two years. The brand and website are also included in the purchase.

With a new 2-year supply contract in place, the vendors would like to see a new and more commercial-oriented owner take it to the next level and reap the rewards. If required, the vendors are open to managing the business for the new owner or training their staff for 1-2 years to ensure a successful transition.
