- ✓ Training & Support

## Revolutionary Building Solution, Territory Licenses for Sale

### Opportunity

This is a special opportunity for builders, corporate builders, investors, architects, engineers, and other industry professionals passionate about constructing safe, healthy, fire-proof, energy-efficient, and sustainable houses. You have the expertise and vision to make a significant impact in the construction industry. The vendor presents you with an exciting opportunity to make a true, innovative, positive difference to building efficiency and environmental sustainability by becoming a licensee in your territory.

### Technology

This system, developed locally and marketed internationally, offers an innovative solution for constructors looking to reduce costs, improve quality, and save time. Its component-based design meets the growing demand for faster and more efficient construction methods without sacrificing quality or reliability.

The system creates a safe, comfortable, and energy-efficient living environment with high fire ratings and excellent noise and thermal insulation properties. Its key components provide a fast and efficient solution for constructing thermally efficient and airtight buildings. They can be used for external and internal walls, roofs, and intermediate floors in virtually any design and application. They are designed for easy erection, enabling rapid on-site construction. The building envelope can typically be constructed to a wind and watertight state within days of delivery.

The Building System is a revolutionary approach to home construction that encompasses a wide range of unique attributes and benefits for both the home builder and homeowner. Its cutting-edge technologies, advanced materials, and innovative design principles create dwellings that will surpass industry standards in every aspect.

### Key features of the Building System:

- 1. Safety:** Structures built with the Building System are meant to last, providing unparalleled safety for occupants. Structural integrity, fire resistance, and robustness are far superior to conventional stick frame businesses. Structural strength is never lost, even at high temperatures.
- 2. Health and Comfort:** The Building System prioritises the health and well-being of occupants by ensuring excellent indoor air quality, efficient ventilation, and a comfortable living environment in their homes.
- 3. Cost-effectiveness:** The Building System benefits builders and home buyers by saving on costs and improving efficiency. Their standardised components and building techniques complete projects efficiently, requiring less labour, time, and materials. Homes built with the system are energy-efficient and sustainable, leading to significant cost savings on utility bills. They are also durable, low-maintenance, and provide buyers with long-term financial benefits and peace of mind.

4. Energy Efficiency: The Building System strongly emphasises energy efficiency, utilising sustainable practices to minimise energy consumption and reduce carbon footprint. This benefits the environment and leads to substantial cost savings for homeowners, with power bills reduced by up to 60%.

5. Sustainability: The Building System embraces sustainable building practices and materials to minimise environmental impact. They promote eco-friendly construction methods, waste reduction, and the use of renewable resources.

## **Territories**

Territories are priced taking into account population, building activity, and future prospects. As a result, territory licence prices vary from as low as \$10,000 to nearly \$500,000.

By acquiring a territory, you gain exclusive rights to utilise the Building System and construct dwellings that exemplify the highest standards of quality and innovation. As a licensee, you can operate within your designated territory, meeting the growing demand for safe, sustainable, and energy-efficient homes and selling to other builders for new and renovation projects.

Licencees are the key to success, and they are provided with comprehensive training and support that includes:

- Access to proven building techniques, technologies, and design methodologies.
- Training and educational resources to ensure you have the knowledge and skills needed to excel.
- Ongoing marketing and promotional assistance to help you establish a strong presence in your territory.
- Collaboration opportunities with other like-minded professionals within the network.

A licence for your territory will open up new horizons and lucrative opportunities in the construction industry. Working with the owners of this Building System will transform the way houses are built, improving the lives of countless individuals and families.
