

Glass Technology Business for Sale Christchurch

For Sale

Location: **Christchurch**
Asking: **Price by Negotiation**
Type: **Wholesale/Distribution**

Leading Glass Technology

Our Vendor is renowned for being one of the leading structural frameless glass companies of its type in New Zealand, catering to Commercial, Industrial and Residential Markets.

The business is continually developing innovative new products and systems incorporating excellent fully engineered specified glass products and systems. Here is the opportunity for a licence-holder to benefit from this patented technology. Specifications covering the products have been prepared which makes approval of the use of these products by local authorities very straightforward.

What is being offered to the market is a licence to obtain and utilise these products and systems in other areas of New Zealand (and further afield) where the demand for these products is expected to be strong.

A licence-holder can access the "Centre of Excellence" which our Vendor is establishing to provide support to licensees with any technical or construction matters. This support gives a licence-holder a distinct advantage over competitors in their market.

This is, in our view, a perfect option for those fully committed to the quality architectural glass and glazing sectors.
