Owner Retiring Iconic Kapiti Coast - Engineering/Fabrication Business

Profit \$129,000

The owner is retiring after nearly 30 years of ownership!

In that time Proline Engineering has become a trusted name specialising in aluminium, stainless steel, and mild steel products. With a diverse product line, including gates, balustrades and custom architectural solutions, the business serves a well-established, affluent client base on the Kapiti Coast.

This business would suit an owner-operator or be ideal as an add-on to an existing related business. A new motivated and energetic owner could maximise the opportunity by modernising systems, utilising technologies, processes to generate efficiencies and drive new business via digital marketing.

Key Considerations

- Very established
- Monday-Friday trading
- Qualified/experienced staff in place
- Plant & Equipment

It's time for the vendor to move on the foundation is in place for you to take the business to the next level. The owner is available to assist a new owner with a smooth transition. With the extension of State Highway One, there will be a further need to provide culvert, stream bridge and security fencing. The growth potential is there!
