Type: **Services-Other / Construction**

H2O Essential Infrastructure Contractor

Owner Retiring

H2O Contractors has provided Infrastructure-related services for over 20 years in the Wellington region. During that time they have increased their capability and services and are an essential part of Wellington's municipal, commercial and residential infrastructure and will be for the foreseeable future.

The business services include drain cleaning, high-pressure blasting and CCTV inspections. H2O are proud of the considerable work they have completed on Wellington's waterfront, with our maritime industry and with our infrastructure and commercial building developers.

The business has weathered good and bad economic cycles with recent revenues fluctuating.

- 2024 \$1,423,141 Revenue
- 2024 \$362,780 Profit to working owner
- Staff-capable & experienced
- Fully equipped-includes extensive asset & parts list

The business offers lots of scope for growth particularly given some of the systems & processes are a little outdated.

Reinvesting in client relationships with council, and waterfront operators, looking to update the company's marketing strategy and more could see a new owner build a substantial asset for the future.

If you are looking for the perfect business this isn't it! However, if you believe you can add value by applying your drive, motivation and business nous then this is definitely for you.

Priced to sell, you won't find another opportunity like this, don't delay and call now, Steve Smith 027 6063344.
