

For Sale

Location: **Auckland**
Asking: **\$150,000**
Type: **49% partnership or \$320,000 for whole business**
Services-Other / New Opportunities

Seeking a business partner to operate a mobile laser cleaning service. There is plenty of room for expansion beyond the already established clientele. Or buy the entire business to take all profit and run it as your own. Turn key and ready to make profit.

Eco Laser Solutions is New Zealand's most established Laser Cleaning business, offering mobile laser cleaning services throughout the North Island and the possibility of home-based cleaning of smaller items.

Using laser technology to efficiently remove unwanted contamination from valuable assets, there is an opportunity to expand this industry throughout NZ.

Our current clients are mainly in the food and beverage sectors. So if you have further contacts, this would be a benefit.

I am looking for a business partner to buy in and operate the van and machine as and when required. My current employment situation takes me overseas for long periods every 6 weeks. This is affecting the ability to operate the business as required.

I would like to continue building the business with a person in a main city to engage more clients through marketing, demonstrations, and following up on inquiries.

Negotiable on the terms and conditions. I have invested over \$400k to establish Eco Laser and three years into building the business. My current employment does not allow me the time to commit to its growth.
