Type: **Services-Other**

Wellington's #1 Rated Electrical Company - Innovative Systems & Software

It can be very challenging to operate a trade-based business as there are so many areas of business that need to be addressed to be successful. The owner of the business understood these challenges and identified a number of these inherent issues of running a successful trade business. They then developed the systems and software to enable them to operate more efficiently and deliver the best possible service to their customers. This business is an outlier with the potential to scale locally and regionally.

Moses Electrical is a locally owned and operated electrical service operating in the Wellington region. They provide a comprehensive range of services from full electrical renovations, emergency work, electrical maintenance, re-wiring, complete home fit-outs, residential services, home ventilation systems, electrical safety and EV-Charger Installations.

Custom systems and software:

- Captures every lead and engages with customers - zero missed connections
- Customers can schedule their own appointments
- Intuitive CRM system
- High conversion rates - leads to jobs
- Reduces the need for costly administration
- Improves cashflow

This innovative business model provides real leverage for a new owner as the business can be scaled. If you are looking for a profitable business with some real upside call me Steve Smith on 027 6063344 now.
