### Bay of Plenty Opportunity with R.O.I. of 33 % p.a

An already established, proven, financially successful, small business with sales of \$2 Million to \$3 Million per annum, having strategically implemented processes that ensure that manufactured products are customised to a high- quality industry standard which ensures the highest possible level of customer satisfaction.

Indicative of the structure of success of this business is its ability to operate successfully with a relatively small number of dedicated and devoted staff who, not only oversee existing production processes but are able to prioritise same in a manner that maintains that process of achieving a high level of customer satisfaction from the outset which obviously plays a positive role in promoting and maintaining brand awareness in its market place.

It is perceived that having reached this level of business success, the next real step forward for the business will likely involve a new owner adopting, or indeed defining, the new owner's vision for business' expansion and thus the implementation of the resulting marketing strategy same the bringing together a finalisation and an implementation of a nationwide focus on growing the business to its next level through strategic focus on taking advantage of the perceived current market potential and systematically implementing such growth steps as a new owner of this business applies its vision going forward.
