Food "Snack" Manufacturing - Auckland

Profit \$181,000

Here is an opportunity to secure a long-established food manufacturing business producing its own branded range of snack products.

The business has built great relationships with "Blue Chip" retail clients, which include major supermarkets and multi-distribution channels.

Producing a delicious premium product has created a very loyal customer base and, in the process, has become a trusted brand.

The manufacturing facility is well-laid out and set up for maximum output. The owner works part-time and has well-trained staff to carry out the production plus management.

- Simple, limited range of products
- High-volume sales
- Potential to introduce new products
- Sizeable production capacity currently running at 60%
- Commenced online sales

Recently, the owners introduced a new pricing structure, which has been accepted across the board by their "Blue Chip" clients. This new cost structure will translate into a strong increase in profitability.

This business would ideally suit:

- Existing food manufacturer looking to add on
- Someone with a Sales or FMCG
- Entrepreneur

The owners are moving overseas for family reasons.

The timing to buy this business could not be better.

The hard work has been done, great product, the factory is running like clockwork, a great team in place and with higher profits on the way!
