Turnover: **\$1,270,000**
Type: **Communications/Technology**

Software Business with IP & Recurring Revenue

At its core is a robust recurring-revenue model delivering stability, predictable revenue. Purpose-built software create high barriers to entry, positioning this business for long-term success.

The customer base is exceptional, with outstanding retention and multi-year contracts that expand recurring revenue annually. The incoming owner need not be highly technical; the experienced team (predominantly remote) holds the key domain expertise.

This business can be operated from anywhere in NZ or offshore, offering flexibility with security. A comprehensive handover will be provided.

Highlights

1. Strong recurring revenue streams
2. Long standing NZ and Australian customers
3. Internally developed IP; very high barriers to entry
4. Experienced, mostly remote workforce

International enquiries welcome.

Strict confidentiality applies. Approved applicants only. Contact to arrange a confidential discussion.
