Asking: **Price Comprising Plant & Machinery at \$450,000 (est market value)**
Type: **Agriculture/Hort/Aquatic**

Horticultural Contracting

This established business provides an essential service to growers, working in conjunction with 2 - 3 of the major post-harvest operations.

The current owners began operating approx. 25 years ago and have now a loyal group of 40-50 growers offering repeat business each year.

The machinery is well maintained (as it has to be) and is housed at the owners own orchard yard. Regular maintenance is carried out by the Owner with other maintenance scheduled with the servicing agents.

Owners Role

The owner is fully involved and coordinates the daily operations and is the contact point for growers. He does become involved in the actual contracting when required.

Key Business Attributes

1. Loyal group of repeat customers
2. Established 25 years + trading history
3. Long standing relationships with key packhouses
4. Small group of well-trained staff
5. Industry protocols and regulations all adhered to

A new owner will ideally have an operational background with contracting and mechanical skills an ideal backup. The Owner will offer generous assistance with the transfer of skills, knowledge and customer relationships.

Net Surplus \$147,000 EBPITD 2025FY

EBPITD = Earnings Before Proprietor, Interest, Tax and Depreciation
