

# Solar Installation Business for Sale Installing across Auckland and beyond

**kakapo**

ESTABLISHED SOLAR WITH A BRIGHT FUTURE  
Installing across Auckland and beyond

## Established Solar With a Bright Future. Profits of \$147,000+

Here's a glowing opportunity to step into New Zealand's growing solar energy market with a well-established and highly regarded solar installation business.

Specialising in residential, commercial and off-grid solar solutions, the business delivers sustainable energy systems with a reputation for quality installation, practical design and outstanding customer service.

The business was designed for efficiency and scalability. A new owner will benefit from highly efficient operating systems, specialised assets and installation practises, and the ability to call upon a team of experienced contractors to support ongoing growth. Plus, with limited marketing to date, the business is ready to shine even brighter through an increased focus on digital advertising, strategic partnerships and referral strategies.

Following surgery last year and some time away from the business, the owner has decided it's now time for a new owner to take the reins and capitalise on the strong growth potential ahead. With solar panels installed on just 3% of New Zealand households (compared to 35% in Australia), the opportunity for growth is significant as more consumers look to take control of their energy needs and costs.

### Business Highlights

- Established solar installer with strong supplier relationships
- Fully independent, no franchise fees
- Trusted network of experienced subcontractors
- Assets include fully branded vehicle
- Significant growth potential through strategic marketing, online presence and lead generation
- Highly systemised, efficient operation using modern tech
- Minimal inventory and a low fixed cost base
- Client database of 300+ warm prospects
