

# Door Manufacturing Business for Sale North Auckland

## Well-established Auckland Door manufacturer

A rare chance to acquire a respected Auckland door manufacturing business supplying both residential and commercial construction markets. With decades of continuous trading, the business is known for quality workmanship, reliability, and fast turnaround times.

It manufactures a broad range of products, including cavity sliders and pre-hung door systems, and services a diverse mix of trade and retail customers. Strong repeat work and long-standing client relationships underpin the intrinsic value in this business.

The business currently operates from a well-located Auckland workshop of approximately 200sqm (more or less) and the business will suit someone with spare capacity and/or unused space as the business will need to be relocated over time.

This turnkey operation includes machinery, inventory, a delivery vehicle, established systems, and a small experienced team. Average annual revenue exceeds \$1m, with EBITDA margins of up to 20%. Limited owner involvement makes it suitable for both owner-operators and trade buyers.

Growth opportunities exist through an improving construction market, increased marketing, extending geographic reach, or integration into an existing operation. The sale is due to a change in the owner priorities.

Location: **Auckland**

Type: **Manufacturing**
