Premium Custom-Built Mobile Café Business

Premium Custom-Built Mobile Café Business

A rare opportunity to purchase one of New Zealand's most unique and professionally built mobile café businesses.

Purpose-built from the ground up, this isn't a standard food trailer—it's a custom-designed mobile café that has been engineered to stand out. Every detail has been carefully considered, combining exceptional craftsmanship with practical functionality to create a business that consistently attracts attention wherever it operates. Reproducing a trailer of this quality today would be extremely difficult and would cost significantly more than the asking price.

Built with a lightweight aluminium body and a professionally engineered heavy-duty chassis, the trailer is designed to handle New Zealand's harsh conditions, including coastal environments, while remaining lightweight, durable and corrosion-resistant. The underside is exceptionally tidy and reflects the quality of the build throughout. It has also recently been professionally wrapped with a fresh surf-inspired design that gives the business outstanding street appeal while remaining easy for a new owner to rebrand if desired.

Powering the café is a **Honda EU70is commercial inverter generator with a 32-amp connection**—widely regarded as one of the best generators available. Quiet, extremely fuel-efficient and exceptionally reliable, it has only **approximately 700 hours** of use, meaning it's only just getting started.

The business has built an excellent reputation operating at festivals, markets, corporate functions, community events, sporting events and private bookings, serving premium coffee, smoothies and real fruit ice cream. It enjoys strong repeat business, loyal customers and long-standing relationships with event organisers.

Even better, the upcoming summer season is already looking exceptionally busy, with a strong calendar of confirmed bookings and repeat events already secured. This allows a new owner to step into immediate income from day one rather than starting from scratch.

Included is everything required to begin trading immediately, including the custom-built trailer, commercial equipment, operating systems and branding assets. The business can continue operating exactly as it is, or the new owner can introduce their own brand with minimal effort.

Whether you're looking for a lifestyle business, an owner-operator opportunity or a profitable investment with significant room for growth, this business offers exceptional flexibility. There is still enormous potential to expand through additional festivals, corporate catering, weddings, sporting events, schools, private functions or even by establishing a permanent beachside or high-foot-traffic location.
