Relocatable Automotive Training Business

National Automotive Diagnostic Training Business - 100% Relocatable

An exceptional opportunity to acquire a highly respected automotive diagnostic training business, established in 2001 and delivering specialist technical courses to automotive technicians across New Zealand.

The business is fully relocatable, with nationwide course delivery through in-person and online formats. Demand is strong, with the 2026 training calendar effectively full and 2027 already filling rapidly, giving strong forward visibility and demonstrating brand strength and market demand.

The business operates in a specialised growth sector driven by increasing vehicle complexity, advanced electronics, EV/hybrid technology, and the ongoing need for technicians to upskill. With nationwide delivery, it is not tied to one location and can be operated from anywhere in New Zealand.

Key Highlights:

- * 100% relocatable business model
- * Nationwide customer base and course delivery
- * 2026 training schedule full
- * Strong forward bookings secured for 2027
- * Proprietary training content and intellectual property
- * Online training academy and established course pathways
- * Highly respected automotive industry brand
- * Barriers to entry through specialist knowledge and reputation
- * Opportunity to scale via additional trainers and expanded course delivery
- * Extensive vendor handover and support available

Ideally suited to a buyer with technical automotive experience or strong teacher management skills. Training or education delivery experience would be advantageous, with the current owner available to support a structured handover.

LINK Bay of Plenty
Licensed REAA 2008
Broker Ref: BOP00934

With vehicle complexity, hybrid and EV adoption, and a shortage of advanced diagnostic capability increasing, the business is well positioned for continued growth.
