

Podiatry Clinic Business for Sale Te Aro

Established Wellington Podiatry Clinic | Retirement Sale

An accredited clinical practice. A central-city location. An opportunity to shape its next chapter.

Biz M&A presents The Podiatry Clinic, a long-established Wellington practice offered for sale as its principal prepares for retirement. With practice heritage in Te Aro dating back to 1978 and patient relationships spanning generations, this is an opportunity to acquire an established operating practice rather than build a clinic from the ground up.

The clinic is an Allied Health Services Sector Standard Accredited Clinical Practice and an ACC Accredited Contract holder, providing an established clinical and operating platform for a new owner.

Located in central Wellington within a building occupied by other healthcare services, the practice combines a broad podiatry offering with treatment rooms, in-house orthotic capability, established systems and a substantial range of clinical equipment. The opportunity may suit a qualified clinician, an established podiatry practice or a healthcare group seeking a central-Wellington presence.

Business highlights

- Allied Health Services Sector Standard Accredited Clinical Practice and ACC Accredited Contract holder.
- Three treatment rooms, supported by a dedicated stock room and combined workshop area used for in-house orthotic repairs and construction.
- Broad service offering including general podiatry, musculoskeletal care, prescription orthotics, ingrown toenail procedures, children's foot care and SWIFT verruca treatment.
- Established operating systems, with Gensolve supporting bookings, patient records, billing, claims and patient communications.
- Comprehensive clinical equipment, including SWIFT machine, autoclave, ultrasonic cleaner, Doppler ultrasound, dermatoscope and digital scanner with iPad. The vendor advises that a number of key items have been added or replaced within the past three years.
- In-house clinical capability, with podiatry work currently undertaken within the practice rather than outsourced.
- Development opportunities through improved treatment-room utilisation, patient recalls, musculoskeletal and orthotic pathways and potential nursing home, hospital and domiciliary service contracts.

The proposed transaction comprises the operating business and agreed assets. Handover support can be negotiated with the retiring principal to assist with continuity of care, systems familiarity and transition to new ownership. Final asset inclusions, staffing arrangements, lease arrangements and transition terms remain subject to agreement and purchaser due diligence.
