

Aviation Certification Platform Business for Sale Auckland

Aviation Certification Platform | APAC

A rare opportunity to acquire a certification-led aviation platform, where regulatory access, IP, and experience form a durable competitive edge.

Investment Highlights

- * Regulatory Moat: CAANZ Part 146 Design Organisation with delegated certification capability
- * IP Engine & Compliance Infrastructure: Extensive proprietary certification IP, including decades of engineering data, frameworks, and templates across a wide range of aircraft, components, and modifications.
- * Importantly, this includes the full Part 146 Exposition, Safety Management System (SMS), and associated procedures-representing a substantial setup cost and a significant barrier to entry
- * Sticky Demand: Certification-driven workflow supported by long-term client relationships
- * Global Relevance: Work aligned with internationally recognised standards (FAA / CASA pathways)
- * Under-Scaled Platform: Capacity constrained by resources, not market demand

Core Capability

End-to-end certification of aircraft modifications and repairs, including regulatory approvals, compliance pathways, and engineering documentation.

Strategic Upside

- * "Instant" Design Organisation Platform
- * Scale engineering capacity to unlock immediate growth.
- * Expand internationally using recognised certification standards
- * Develop proprietary certification products (e.g. STCs)
- * Integrate into aviation, MRO, or engineering groups
- * Leverage IP with Emerging Technologies

Includes full intellectual property suite, certification frameworks, client base, and operational systems. Regulatory approvals are linked to nominated individuals, with transition achievable via standard aviation authority processes. Strategic aviation groups, MROs, engineering firms, or investors seeking a high-barrier entry point into the certification segment.
