

Cabin rental Franchise for Sale Whangārei

Own your region. Build your business. Leverage an established brand, proven systems and powerful proprietary software to tap into growing demand.

Hire A Hut rents premium portable cabins. The fleet ranges from open plan rooms to small self contained units for long term accommodation needs. Every Hire a Hut cabin is built to code by licensed building practitioners, to the same standard as a residential new build. They are built to meet H1 energy efficiency standards which means they exceed Healthy Home regulations. We build with quality materials selected not just for their strength, but for how easy they are to maintain and repair over time. Josh started building cabins in 2016 and in 2020 Hire A Hut was born - reaching markets from Wellington to Kaitia. With 10 years in the industry we have built proven systems and processes. Including proprietary software that does the majority of the heavy lifting from first enquiry to end of lease (and everything in between). The demand is real. The brand is established. Now it's time to grow and we are ready to help the right people build the same thing, in their own region.

Business Resources

Franchisees receive hands-on pre-launch training at Head Office with Josh and Chantelle, covering rentals, operations and Hut Hub (our proprietary software). We coordinate IT setup including email and shared drive access. Training includes quoting, contracts, delivery, customer management and preparing for the first months of trading. Franchisees have the full support of head office and our national marketing.
